

Why Kineticico?

Kineticico Water Softeners eliminate the problems that are typically associated with the older technology of the single tank electric water softener.

Non-Electric: Kineticico Water Conditioners solve several electric water softener problems. Kineticico Water Conditioners eliminate the problems of timer, solenoid and microprocessor problems due to power outages, power surges or damp conditions. Kineticico systems are powered by the energy of moving water. No clocks, no timers, no plugs and most importantly, no problems.

Twin Tanks: Kineticico Water Conditioners solve several single tank softener problems. When a single tank softener is in regeneration, the system is bypassed, allowing un-softened water to go through your home. A Kineticico Water Conditioner has a second tank that provides conditioned water to your home during regeneration allowing 24 hour a day, 7 day a week soft water.

When a single tank softener regenerates, it uses hard untreated water to clean itself out. This leaves a residue which shortens the life of the resin, and the unit. A Kineticico Water Conditioner uses soft, clean, filtered water from one tank to clean and rinse the other tank, allowing the unit to get completely clean and lengthening the life of the unit.

When a single tank softener regenerates, it uses hard water to create the brine used for cleaning and hard water passes through control parts, making them corrode and not last as long. A Kineticico Water Conditioner uses soft water to create the brine used for cleaning, and control valve parts operate in soft conditioned water lengthening the life of moving parts and using less salt.

Outstanding Warranty: When putting a high quality product like Kineticico in your home, you'd like the peace of mind to know that you are getting the best warranty in the business. Well you are. Kineticico provides a 10 year warranty on your system. This is not only a manufacturer's defect warranty, but a performance warranty as well. Tim Beil Plumbing is matching that warranty with a 10 year labor warranty. If for any reason your Kineticico Water Softener is not working properly within the 10 years, the unit is under warranty, parts and labor!!

Note - Certain pieces of equipment need media or filters for proper operation. These items are not under warranty. These items are salt for a Water Softener, calcite for an Acid Neutralizer, filters for an R.O. and carbon for our municipal whole house softener/dechlorinator.

The Kineticico Design just makes sense. Ask about our Reverse Osmosis Drinking Water Systems too!!
